

PocketLab

by Myriad Sensors

Science for Everyone

PocketLab Voyager is an all-in-one science lab that is capable enough for a professional engineer and simple enough for year five students. Voyager can measure MOTION, LIGHT, MAGNETIC FIELDS and TEMPERATURE (with an external probe)

PocketLab

by Myriad Sensors

The PocketLab Community includes thousands of educators and students worldwide exploring science and engineering together.

Find lessons, activities, and programming applications suitable for everyone from year five Earth Science students to college-level engineering students
