- Remote Control mode ⍰ Expressive sounds and LED lights
- Character and Content downloads
- OzoBlockly-Enabled for introductory to advanced programming
- Bluetooth-Enabled
- 60+ Minute Playtime

Ozobot Bit Robot

- Colour and Line Detection
- Character and Content downloads
- OzoBlockly-Enabled for introductory to advanced programming
- 60+ Minute Playtime

Ozobot Evo is the smart and social robot that teaches you to code while connecting you with friends. Evo entertains right out of the box with an expressive language of sounds, LED lights and a little bit of attitude. The bot uses proximity sensors to avoid obstacles and optical sensors to recognize colours.

Download the Ozobot Evo App on your smartphone or tablet to enjoy remote controlled and programmable play with Evo. Find friends who have Evos of their own, and challenge them to races and coding games. Send and receive messages and Ozojis—Evo behaviours that combine lights, sounds and movements to express ideas and emotions. Re-program your Ozojis with the OzoBlockly editor to make them uniquely your own.
