

From 2018, Digital Technologies | Hangarau Matihiko will be strengthened in *The New Zealand Curriculum* and *Te Marautanga o Aotearoa*, starting at Year 1.

INTRODUCING, A programmable floor robot

Blue-Bot

The Blue-Bot app has been designed to work across a number of platforms and is a free download. Using the app with Blue-Bot unleashes the full potential of Blue-Bot in your classroom. Once you open the app on your device, select your Blue-Bot and get programming! The app allows you to select a Bee-Bot mat that you may already have, so you can replicate what's on screen in real life!

Blue-Bot® Bluetooth Programmable Floor Robot

Bluetooth enabled floor robot, which means you can wirelessly control it with your tablet.

Blue-Bot has a clear shell so children can see the components inside. It is also rechargeable so you don't need to worry about replacing costly batteries.

You can still use Blue-Bot like a normal Bee-Bot and program it using the buttons on the robot. However, Blue-Bot is now capable of connection to tablets, PCs and Macs, allowing you to take the programming much further. Download the free iOS/Android app to connect to tablets, or download the Windows and Mac software below to connect to your desktop. For another fun way to program Blue-Bot, please see our Blue-Bot Tactile reader. Packs of 6 come with a free docking station. Not suitable to be used in sand or water.

Single Blue-Bot

\$197.50 + GST

Class set of six with docking station

\$1,185.00 + GST
