

Premium LCD Trolley System

Sitech Systems Premium Display Trolley

Designed and manufactured in New Zealand to support the NZ approach to Innovative Learning Spaces, which celebrates small group work with larger collaboration spaces. It also recognises the need for educators to integrate technology.

The trolleys are perfect for more flexible learning spaces where teachers are team teaching in the same environment. Enables the teacher to move away from up front of class teaching.

Useful in the library or resource centre as well as more traditional classrooms. Our trolleys enable you to use multimedia in an on-court coaching session as it is easy to wheel into the gym.

As we see more and more glass in our learning spaces, and less wall area, a mobile TV Trolley means that you can simply move your screen away from sunlight and glare, as well as freeing up valuable wall space.

AS/NZS 62638.1:2018

Sitech Systems is always thinking about safety, with the new audio and video industry standard coming out in December, Sitech has already tested our range of trolleys to meet the new requirements in:

- **Static Stability Test**
- **Relocation Stability Test**
- **Horizontal Force Test**
